Summary

A front end developer with a passion for entrepreneurship and growth hacking techniques. Web development is what I love to do and I have been doing it since 2011. I like being part of the creative process and working closely with creative people.

Lately I have been experimenting a lot with Flutter and finding it awesome. I hope to be working with it in the near future.

I have great experience developing Vue.js applications and working with REST and GraphQL APIs
I am also into Google's Firebase environment (Cloud Functions, Cloud Firestore, etc..)

The tech I love:
- Vue
- Nuxt
- Node.js
- GraphQL
- Wordpress
- Flutter
- Hasura

Experience

Front End / Vue.js Developer
Parent Scheme
Jun 2020 - Present (8 months +)
Parent Scheme is a company that has a positive impact in a pandemic world. I think we were able to help and support many working parents in these difficult times.
As a Vue.js developer my role is to help maintaining and developing features.
I work close with the CTO to ensure high quality and performant code.
The Parent Scheme web app is based on the new Vue 3 framework and Nuxt.js.
Lately, as a second project, I've started to develop a native application using Flutter and it's getting great.

Personal Project
Flavy
May 2019 - Jun 2020 (1 year 2 months)
Flavy is a project I challenged myself to develop in Vue.js, Firebase and Stripe to help restaurants and pubs serve customers more efficiently using smartphones as digital menus.

With Flavy customers browse the menu directly from their smartphone, order without any waiting time and reorder independently, without needing to download any app.

Web Developer
WMP Creative
Jul 2016 - Apr 2020 (3 years 10 months)
Developing WORDPRESS themes for multiple clients
Developing Progressive Web Apps with VUE and NUXT
From January 2019 to March 2020 I worked with WMP as a freelancer. Helping them with current projects and maintaining old ones.

Web Developer & Growth Hacker
IMANI
May 2018 - Mar 2020 (1 year 11 months)
Being part of the first development team my job was to get Imani's MVP up and running quickly.
After we launched I started to improve the website and transformed it to a Progressive Web App envisioning the benefits of an app-like flow and fast page rendering.
I also take care of the Growth aspects of the business and trace strategies to improve our Acquisition and Retention.
The PWA is developed in NUXT on the front end and DJANGO on the backend.

Front End Developer
Supadu Ltd
Jul 2014 - Jan 2016 (1 year 7 months)
Helping on the development of Supadu's in house book reading application.
I had the opportunity to work and develop big publishing websites and applications, such as: Pan Macmillan and C. S. Lewis

Front End Web Developer
Wazoku
Aug 2013 - Jul 2014 (1 year)
Employed by Wazoku as Front-end Developer my role involves the following:

• Taking care of the UI.
• Helping the marketing and design team improve the user experience. • Thinking at new functionalities.

At Wazoku I had my first experience in a start up.
In the beginning my main role was only to solve bugs, but at the present it is to create new functionalities and improve the UI.
I am the very first front end developer at Wazoku, the skills I brought allowed us to offer a better product to our clients.
